

Tree Policy adopted by committee

The COA adopted the following policy as suggested by Arbor Vitae in Spring 2015. This policy was adopted to help the committee deal with queries and issues in relation to trees on the estate.

1. COA trees are regularly inspected for hazards and nuisances and recommendations are acted on to ameliorate the risk.
2. Other tree works may be required between inspection dates due to damage from weather/vandalism/infection etc. These will be acted on.
3. All other proposed tree works that are not due to hazard or nuisance will be assessed, but may not be acted on. The COA has a duty to retain the aesthetic and ecological quality of the area by retaining trees where possible, and by planting new trees.

As agreed by committee in Spring 2015.
